Cardiff MRCS OSCE Course (BENGALURU, INDIA): Communication Skills for MRCS OSCE

From the providers of the highly acclaimed and prestigious Cardiff MRCS Courses in the UK, this intensive revision course covered the communication skills stations of the MRCS OSCE exam. The course aimed to consolidate the trainee's understanding of the clinical consultation skills and aid the trainee's ability to summarise the findings to the examiner in a systematic yet concise manner. The session was dedicated to structured interviews, communication skills workstations, information giving, information gathering and breaking bad news. About 15-20 patient-centred clinical scenarios were used to reflect the situations experienced in everyday practice in the National Health Service in the UK; these scenarios were in line with what is commonly tested in the MRCS OSCE exam. There was the opportunity for every participant to participate and engage in a number of role-play scenarios, enabling him or her to identify areas of weakness and to improve upon these.

Delivered by surgeons and advanced linguistic specialists, the teaching session focused more on the literary and linguistic aspects, British phrases, colloquial terminologies, mannerisms, and interpersonal skills - all within the context of the MRCS OSCE exam. This course, with a high tutor to delegate ratio, was particularly relevant for those with limited experience in the UK hospital setting and for those who have not done their training in the UK.

Course Information

Course Date:	17th March 2019
Venue:	Seminar Room, Taj Bangalore, Near Kempegowda International Airport, Bengaluru, India
Attendance:	4 Delegates
Aimed at:	Candidates Preparing for the MRCS OSCE Examination

Online Revision Resources

DoctorExams consists of 1000s of questions with detailed explanations in MCQ, EMQ, SBA and SAQ formats. Questions are written by the Doctors Academy group of experienced clinicians and clinical academics, with mock exams and feedback on performance included to aid a candidate's focused revision of topics. Based on past exams, these questions are carefully crafted to suit the requirements of undergraduate students & postgraduate trainees undertaking relevant speciality exams.
