Annual Revision of High-Yield Topics for Year-End Exams and Progress Tests

This highly popular and reputed consultant-led and consultant-delivered annual revision course for year-end exams, progress tests, OSCEs and ISCEs focussed on only the most pertinent information required to gain high marks and enable any medical student to significantly increase his/her chance of scoring highly in the year-end exam or improving his/her progress test score, regardless of previous performance. The highlight of the course was the provision of key information and keywords required to correctly answer SBAs and MCQs which broach high-yield topics. By enhancing the end-of-year marks, one will significantly improve his/her chances of winning prizes, intercalating or securing his/her first-choice job upon qualification.

The course was calculated to be worth 120 hours of individual learning.
