Clinical Anatomy as Applied to Trauma and Emergency Medicine & Surgically Applied Anatomy of Important Operative Procedures

7th December 2013

Suttie Centre for Teaching & Learning University of Aberdeen, Aberdeen

Clinical Anatomy as Applied to Trauma and Emergency Medicine

Taught by emergency department clinicians & surgeons, this interactive event covered the anatomical basis in the assessment and management of patients involved in a variety of major and minor trauma. In addition to the anatomical details, pertinent clinical examination were also demonstrated. The sessions were structured in the form of focus-group workshops and individual demonstrations complemented by essential theoretical aspects pertaining to trauma. Some examples of the topics covered were: Stab/gunshot wounds to the neck/thorax/abdomen, head and facial injuries, nerve injuries, tendon injuries (flexor and extensor tendons of the hand), compartment syndrome, chest drain and central line insertion, and emergency cricothyroidotomy.

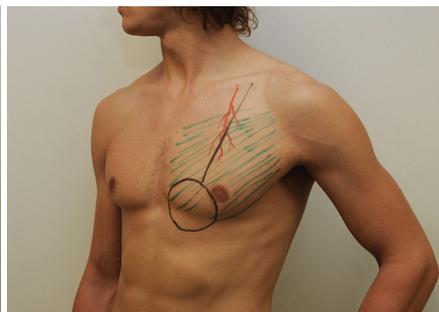

The feedback from the delegates was exceedingly positive, as seen in the subsequent pages.

Surgically Applied Anatomy of Important Operative Procedures

Taught by surgeons, this highly interactive event comprised of focus-group workshops and individual demonstrations complemented by essential theoretical information on surgical anatomy. The workshops used imaginative artwork in identifying important surface anatomy landmarks & the underlying structures on live human models. Attendees were taught the anatomy encountered in common operations, the placement of incisions, the essential principles, and importantly, structures that need to be identified/preserved when undertaking these procedures.

Operative anatomy pertinent to the following specialties were covered:

- o Cardiothoracic Surgery
- o Vascular Surgery
- o Orthopaedic Surgery
- o Plastic Surgery
- o General Surgery
- o Head and Neck Surgery/ENT

Organising Committee

Mr Hassen Ahmeidat
Medical/BSc Med Sci Student
University of Aberdeen

Mr Nigel Ng
4th Year Medical Student
University of Aberdeen

Mr Mark Tsoon
3rd Year Medical Student
University of Aberdeen

Mr Gabriel Cao
3rd Year Medical Student
University of Aberdeen

Ms Clare Morgan
5th Year Medical Student
University of Aberdeen

Mr Abdullah Alanzi
3rd Year Medical Student
University of Aberdeen

Ms Megan Smith
3rd Year Medical Student
University of Aberdeen

Mr Jamie Schneider
4th Year Medical Student
University of Aberdeen

Mr Shiran Gunasekera
4th Year Medical Student
University of Aberdeen

Mr Ahmed Ezzat
4th Year Medical Student
University of Aberdeen

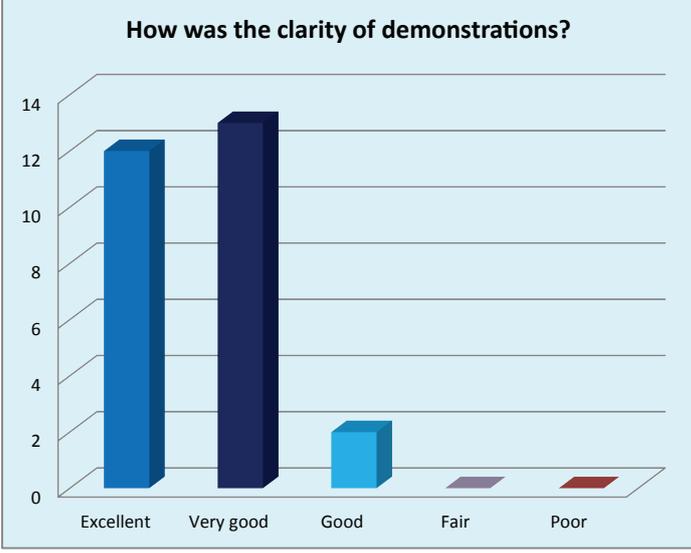

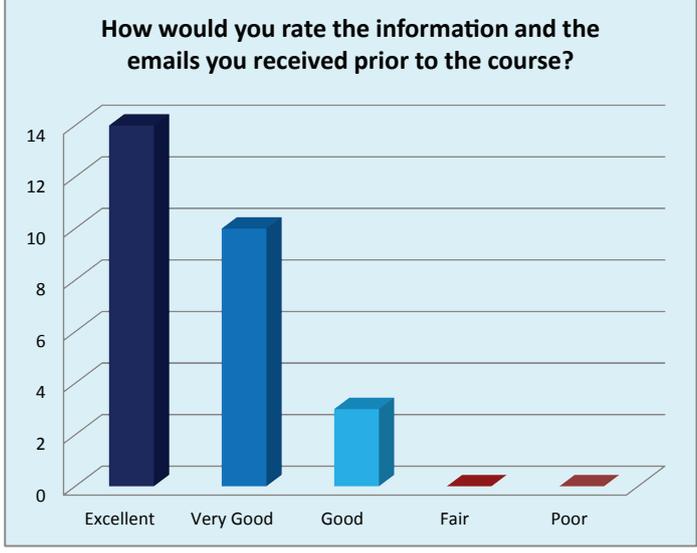

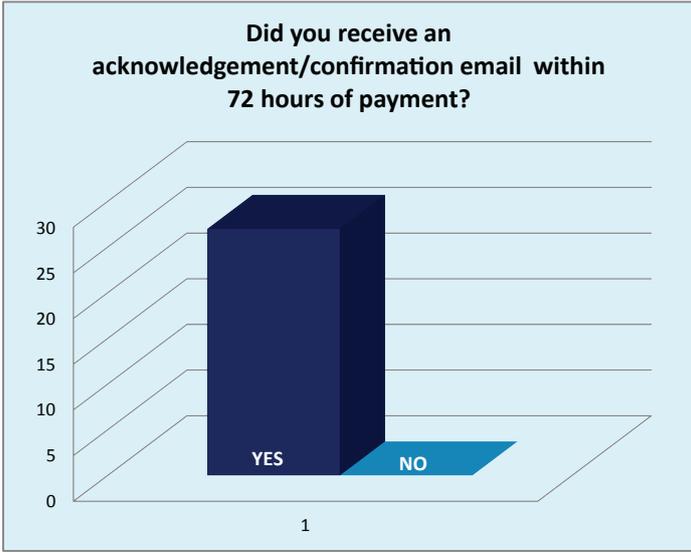

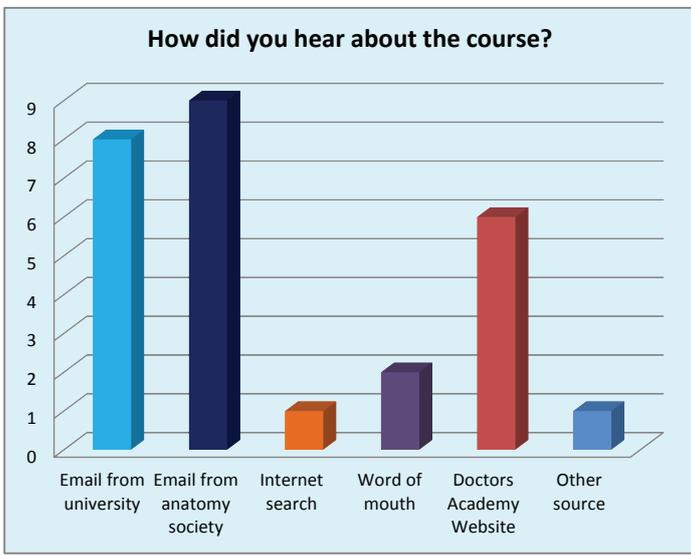

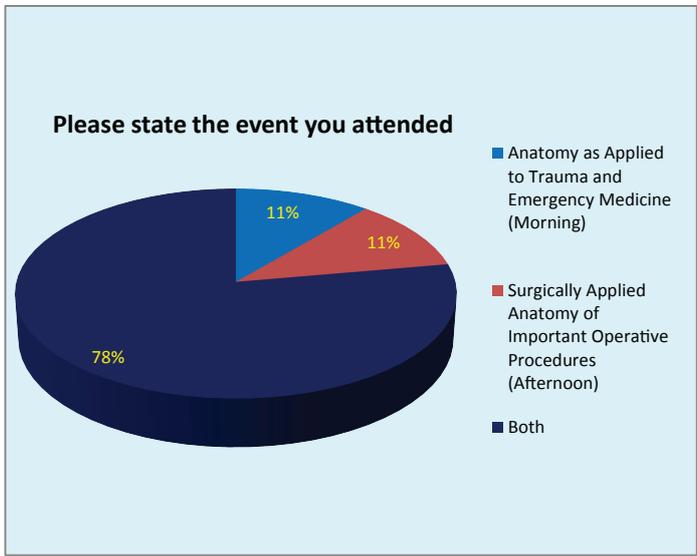

Ms Natalie Maple
3rd Year Medical Student
University of Aberdeen

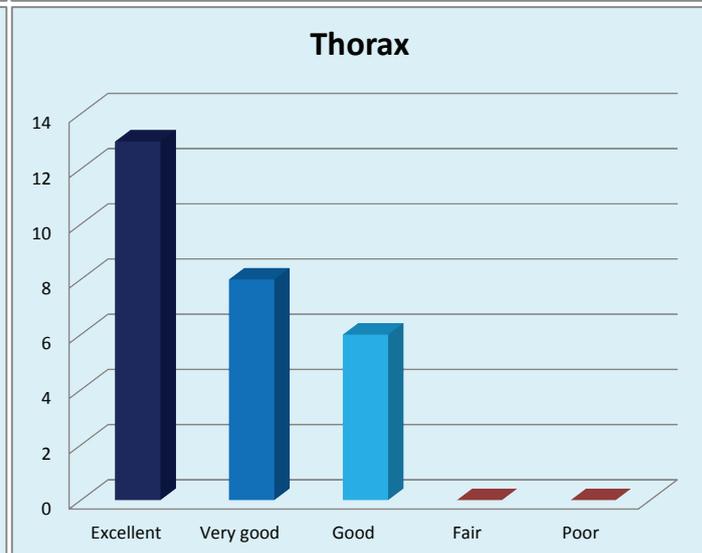

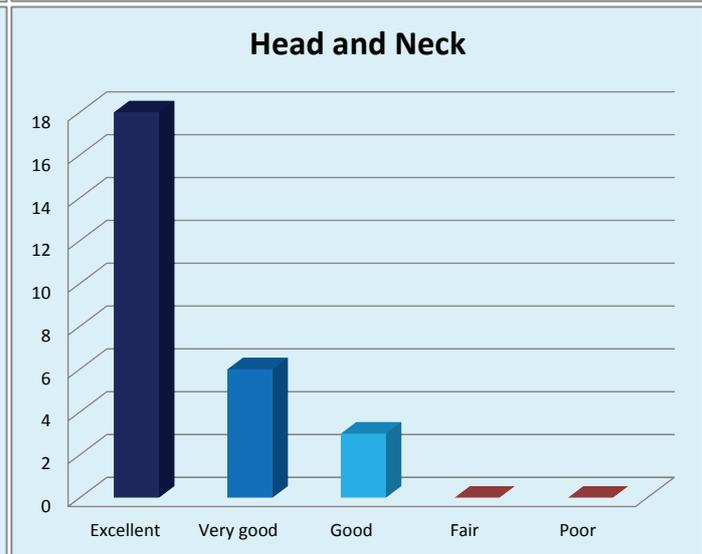

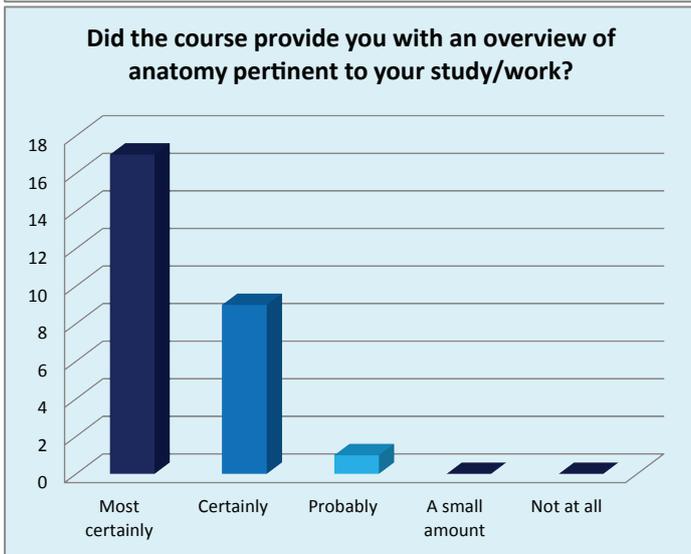

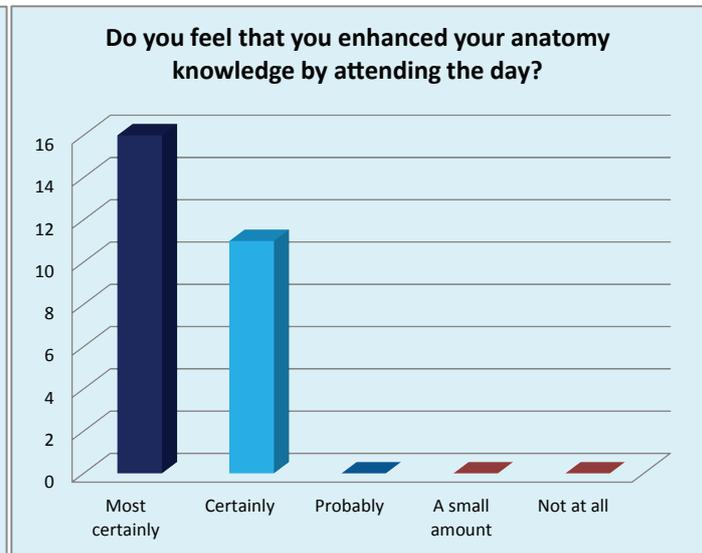

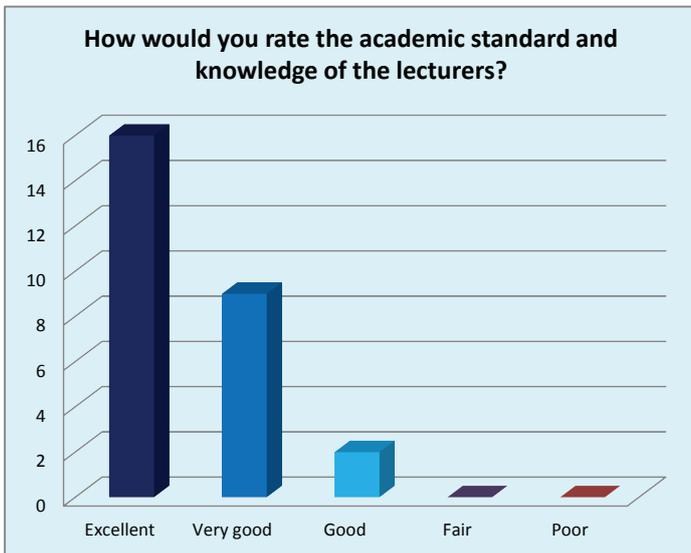

Mr Mohammed Almakky
4th Year Medical Student
University of Aberdeen

Comments

Very organised and efficient with enthusiastic tutors which really makes a difference.

Mr. Laith Khweir
2nd Year Medical Student
University of Aberdeen

Very good course.

Mr. Ricardo Mondoni Madureira
4th Year Medical Student
UNICAMP

It may seem like I filled in the same answer out of laziness, but this was truly without a doubt an excellent course.

Mr. Wesley Cheung
3rd Year Medical Student
University of Aberdeen

It was overall very good, very fast paced so a bit of prior revision is good to do before hand to make the most of the day.

Miss. Susan Martin
3rd Year Medical Student
University of Dundee

Groups were sufficiently small for learning.

Mr. Gabriel Cao
3rd Year Medical Student
University of Aberdeen

Tutors were very approachable and friendly. Good sized groups.

Mr. Ahmed Ezzat
4th Year Medical Student
University of Aberdeen

Very good.

Mr. Frederick Hua Liat Hii
5th Year Medical Student
University of Glasgow

Really relevant, clinical anatomy is so important.

Miss. Jane Hamilton
4th Year Medical Student
University of Glasgow

This course was well organised and the tutors really knew their stuff. The interactive drawing exercises were very good, perhaps add more activities like this?

Megan Smith

Comments

The interactive and hands-on anatomy made the day interesting and very enjoyable. It was very useful and all the tutors were approachable and knowledgeable.

Miss. Maggie Tseng
4th Year Medical Student
University of Manchester

I found it useful to revise anatomy especially clinical anatomy which will be relevant later in my career. The organisation was good and the teaching was of a good standard.

Mr. Harvey Fowler-Williams
3rd Year Medical Student
University of Aberdeen

Very well organized and delivered.

Mr. Timothy Cryle
4th Year Medical Student
University of Glasgow

Very good day of teaching.

Mr. Adam Boggon
4th Year Medical Student
University of Aberdeen

Very well organised and ran smoothly throughout the day. Very much enjoyed the stations & most definitely helped in my revision.

Miss. Frances Nicholson
4th Year Medical Student
University of Aberdeen

Teaching was provided in a relaxed learning environment and encouraged participation. I really liked the intimate and interactive aspect of the teaching, i.e. surface anatomy drawing on peers and the tutors constantly quizzing us rather than didactic teaching. Excellent tutors and very approachable which enhanced the learning.

Mr. Martin Van
5th Year Medical Student
University of Aberdeen

Friendly, approachable tutors. Would like a little more applied anatomy discussions.

Mr. Eric Teh
5th Year Medical Student
University of Aberdeen

Comments

Really well done. Really enjoyable. Very useful for highlighting pertinent Anatomy. Some stations were busier than others, and I personally would have preferred separate stations for thorax and abdomen rather than combined. I would definitely recommend it.

Mr. Adam Young
5th Year Medical Student
University of Aberdeen

Topics covered were of clinical relevance. Tutorials were highly informative. My understanding of anatomy has no doubt been strengthened.

Mr. John Hayes
4th Year Medical Student
University of Aberdeen

It was well organised with adequate breaks inbetween stations. The teaching covered areas important to my studies (4th year student) in a clear manner. I thought the use of washable markers was very good as it helped me to visualise the structures better.

Mr. Ross Jack
4th Year Medical Student
University of Aberdeen

Very well organised and good detail per section.

Mr. James Schneider
4th Year Medical Student
University of Aberdeen

Good revision for anatomy.

Mr. Boon Lin Teh
4th Year Medical Student
University of Aberdeen

Some of the best teaching I've had that is not available in medical school. Thank you!

Mr. Robert Torrance
4th Year Medical Student
University of Aberdeen

Good organisation, I liked the emphasis on informal teaching.

Mr. Shiran Gunasekera
4th Year Medical Student
University of Aberdeen

Very relaxed & approachable teachers which I found created an encouraging environment making tutorials more interactive and beneficial. Overall great recap and interesting way to consolidate learning.

Miss. Silje Welsh
4th Year Medical Student
University of Aberdeen
